Summary

A young, smart and innovative individual with so much passion for the Technology space who enjoys finding simple, easy and useful solutions to problems. My hard work and ability to handle responsibilities well allow me to make excellent use of the tasks given to me. As a professional, I seek a career in a technology-rich environment where I can enhance my knowledge and contribute to the growth of the institution and community at large.

Work Experiences

FoodTrain - US-based Food delivery service startup California USA (6 month Contract UI/UX designer).

November 2021- April 2022.

- I actively involved myself in project works and creation of FoodTrain products.
- carried out appropriate research (direct and ethnographic)
- identified use cases, wrote epics, user stories, acceptance criteria, content and requirements.
- produced working documentations/ deliverables such as experience guidelines, UX flows, wireframes, screens and prototype.
- worked effectively with figma tool and other working software to design and prototype elegant solutions for our product.
- gathered and evaluated user requirements in collaboration with the product managers and engineers.

Leadership and volunteering experience

- Course Representative
- Project team lead
- Member, Red Cross Society

Research and Innovation Office, University of Lagos, Akoka Lagos - Research Assistant (NYSC)

March 2020 - February 2021.

- I carried out day to day duties accurately and effectively.
- quickly learned new skills and applied them to daily tasks, improving efficiency and productivity
- maintained energy and enthusiasm in the fast paced environment.
- developed and maintained courteous and effective working relationships.
- participated in continuous improvement by generating suggestions, engaging in problem solving activities to support team work.
- identified issues, analyzed information and provided solutions.

Federal Institute of Industrial Research - Oshodi, Lagos/ Plant Science Intern

October 2018 - November 2018.

- I conducted experiments in laboratory environments for product development purposes.
- actively participated in the biological production of fibre from *Hibiscus cannabinus* Kenaf plant.
- participated in the production of paper from agricultural waste.
- participated in the production of dense hollow blocks from rice husk.

Education

University of Lagos, Akoka Lagos

Bsc. Botany (2nd Class-Upper division)

November 2015 - November 2019.

**Sacred Heart Catholic College, Abeokuta Ogun state.
(Secondary School)**

August 2008 - June 2014.

Certifications

- **Scrum Alliance (scrum Training)**- I participated in both

the physical and online scrum training, led a mini scrum team project as a scrum master, and subsequently became a Certified Scrum Master (CSM) after taking the scrum certification exam. (September 2021- February 2022).

- **Tech4dev WomenTechster bootcamp (Software development)** - Actively participated in the training, also made a class representative and volunteered for the one week long community service event in educating school-aged girls on opportunities in technology. (January 2022-February 2022).
